### **DETAILED ACTION**

This action is responsive to application filed on August 16, 2001 in which claims 1-20 are presented for examination.

#### ***Claim Objections***

Claims 3-8 are objected to because of the following informalities: Claim 3 ends with a comma.

Claims 4-8 depend from claim 3, thus contain the deficiency of that claim.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the **first** paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Automatically detecting deviations and calculating a classification tree was not described in the specification in such a way as to enable one skilled in the art to make or use the invention.

The following is a quotation of the **second** paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "automatically detecting deviations" is indefinite. It is not clear how the detecting deviations step is automatic when the classification tree is associated with predicates. Further, the segment "calculating a classification tree" is indefinite. It is not clear how/what calculation takes place. Last, the phrases "leaf record set" and "subset of records" are indefinite. Leaf record set and subset of records are not clearly defined.

### ***Conclusion***
